

Internet Infrastructure & Security Market Pulse

Synthetic analyst pack using public context only as a benchmark

Market frame

The case uses a synthetic addressable-market model. Participants should compare market growth, company share, traffic mix and competitor movement. Public Cloudflare disclosures are provided only as context; the detailed internal figures in this archive are game data.

Quarter	Market Growth %	Company Share %	Traffic Index	Market Code
FY24-Q1	11.2	18.4	100	MKT-27
FY24-Q2	10.7	18.1	104	MKT-27
FY24-Q3	9.8	17.8	109	MKT-27
FY24-Q4	9.3	17.5	113	MKT-27
FY25-Q1	8.9	17.2	117	MKT-27
FY25-Q2	8.2	16.9	122	MKT-27
FY25-Q3	7.7	16.7	128	MKT-27
FY25-Q4	7.3	16.4	134	MKT-27

Investigation cues

- Segment code SEG-DEV is reused in the product workbook.
- Market Code MKT-27 appears again in the alternate share sheet.
- Project EDGE-47 appears in the strategic-investment file.
- A second competitor source uses a longer quarterly series.

Analyst note

The apparent growth story is intentionally incomplete. Teams should reconcile market growth with share movement and then compare the investment and operating evidence.
