

Product Portfolio & Unit Economics Review

Synthetic management portfolio

Segment	FY26 Revenue USD m	Gross Margin %	Contribution Margin %	Primary Cost Pressure
Application Security	1020	77.8	69.1	Security support
Zero Trust	640	78.4	67.5	Policy/service cost
Performance / CDN	520	70.2	58.3	Transit cost
Developer Platform	382	71.0	52.6	Compute cost
Network Services	264.4	68.1	49.7	Transit cost

Portfolio notes

- Developer Platform has strong growth but high compute intensity.
- Network Services carries the heaviest transit burden in the synthetic model.
- Application Security remains the largest revenue pool.
- Contribution margin must be read with R&D; and infrastructure expenditure.
