

Three-Year Strategy Review

Synthetic board strategy memo

Strategic themes

Theme	Projects	Strategic intent
AI / Edge	EDGE-47, GPU-52	Support AI and edge workloads
Network Efficiency	NET-31, TEL-09	Improve reach and reduce transit dependence
Security Expansion	ZT-22, WAF-73	Increase Zero Trust and security penetration
Storage / Performance	R2-18, CDN-64	Support high-volume application traffic

Board concerns

- Infrastructure investment is rising faster than some utilization metrics.
- Transit and colocation costs are rising.
- Several projects have materially missed their original return case.
- Large enterprise growth is strong but concentration is increasing.
