

Product Portfolio & Unit Economics Review

Synthetic business-unit analysis

Segment	Revenue FY26	Gross Margin %	Contribution Margin %	Primary Pressure
Home Energy	4760	35.2	27.4	Component input
Industrial Controls	3650	31.8	24.6	Component input
EV Charging	2980	25.4	16.2	Infrastructure
Thermal Management	1880	28.7	18.4	Thermal input
Grid Analytics	1920	42.1	31.5	Data/platform

Portfolio notes

- Grid Analytics has the strongest contribution economics.
- EV Charging is infrastructure-heavy.
- Industrial Controls is exposed to imported power-electronics components.
- Contribution margin should be cross-checked with R&D and field-service data.
