Competitive signals

Synthetic market model tracks share loss in the core passenger-vehicle market. Codes: MKT-27 and SEG-A4 are repeated in the datasets.

The internal team is watching compact SUVs, mass-market EVs, and regional share movements. Do not assume revenue growth equals competitive strength.

Analyst notes

1) Competitor share movement accelerates in the last four quarters. 2) Pricing pressure appears strongest where feature-rich products are compared head-to-head. 3) Several market gains coincide with heavy competitor launch activity.
