

HYUNDAI MOTOR INDIA - CORPORATE WAR ROOM

Procurement & Cost-Center Policy

Reference memo. Some terminology is deliberate breadcrumb material.

Coding conventions

Project codes begin with two or three letters and a numeric suffix. Purchase orders use the pattern PO-[FUNCTION]-[YEAR]-NN. Cost centers use CC-####. Vendor IDs map to the vendor master.

A transaction with a project code but no PO may represent a journal reclassification rather than a procurement event.

Approval thresholds

Above INR25 Cr: functional VP + finance controller. Above INR100 Cr: CFO committee. Above INR250 Cr: investment committee or board-approved program.

Important codes

CAPEX-PLANT, RND, LOG, MKT, WARRANTY, DIGITAL, UTIL, and EV-PLATFORM appear in the ledger. Vendor ID V-017 is an anchor record.

Control note

A small number of manual journal lines were imported from a separate schedule. Teams should not assume every large transaction represents physical procurement.
