

HYUNDAI MOTOR INDIA - CORPORATE WAR ROOM

Customer & Channel Review

Synthetic management review.

Customer concentration

Top accounts contribute a meaningful but not dominant share of revenue. Some large accounts have low margin because of fleet pricing. The customer master is the numerical source of truth.

Channel observations

Dealer retail remains dominant. Fleet business is growing faster in some regions but has lower contribution margin. Digital sales are still smaller but have a higher repeat-service attachment rate.

Risk note

Customer revenue should be checked alongside the churn report. The highest-revenue customer is not necessarily the highest-risk customer.
