

HYUNDAI MOTOR INDIA - CORPORATE WAR ROOM

Three-Year Strategy Review

Synthetic board strategy document.

Strategic pillars

1. Defend core SUV economics
2. Scale EV capability
3. Expand manufacturing flexibility
4. Localize high-value components
5. Reduce working-capital intensity

Board signals

Market share is weakening in the core category despite sustained investment. CAPEX is rising faster than normalized EBITDA. EV investment is strategically important but returns are still below the original plan.

Strategic tensions

The same capital pool is being asked to fund core capacity, EV localization, digital products and quality initiatives. The board requested project-level return visibility rather than aggregate spend reporting.
